JAHAN ENERGY GROUP

AN INNOVATION & TECH. ENG. CO.

Jahan Energy Group, a private entity, initiated its endeavors within the domains of solar energy and power plants. Established by a group of seasoned engineers. Capitalizing on the collective expertise in solar energy systems, the company effectively delivered electricity provision projects.

WHO WE ARE?

Jahan Energy Innovation and Technology Engineering Company (Jahan Energy Group), a fully private entity, commenced its operations in the realm of solar energy and power plants in 2012. Founded by a cadre of seasoned and specialized engineers, it emerged as a dynamic research and development entity. Leveraging the collective expertise and capabilities of its professionals in solar energy systems, the company successfully executed electricity provision projects under contract.

WHAT WE DO?

The co. engages in the following engineering and execution activities:

- Designing, installing, and executing grid-connected solar power plants (On-grid)
- Designing, installing, and implementing off-grid solar power systems
- Fabricating dual-axis solar tracker systems
- Manufacturing solar power generators
- Installing solar water heaters

SOME OF OUR COMPLETED WORK

Examples of the company's completed projects include:

2.5 MW on-grid project

Mapna company,
Alborz province.

20 KW on-grid projects

Residential houses,
Tehran province.

200 KW off-grid project

Electricity distribution Co.,
Mazandaran province.

10 KW off-grid projects

Residential houses,
Tehran province.

50 KW off-grid project

Electrification of rural houses,
Sistan and Baloochestan
province.

Solar Power Generator

Battery: 40000 mAh/ Lithium
Type-C Input
Output: 5V/2.4A, 12V/3A
AC output power:100 W
